

Please don't vote on anything that will lead to more media consolidation. Too many of our local television and radio stations are already owned by conglomerates. It is already too hard to find independent and unbiased news and entertainment.

It seems, you know what you're planning to do is wrong. Otherwise you would have opened up nationwide communications months ago. The airwaves belong to the public, not the FCC. Listen to the outcry of the people. We know media consolidation will severely limit freedom of information and further limit freedom of speech in this country. Please retain the current ownership rules!
